**Have two products in the basket and select „weiter" (check out):**
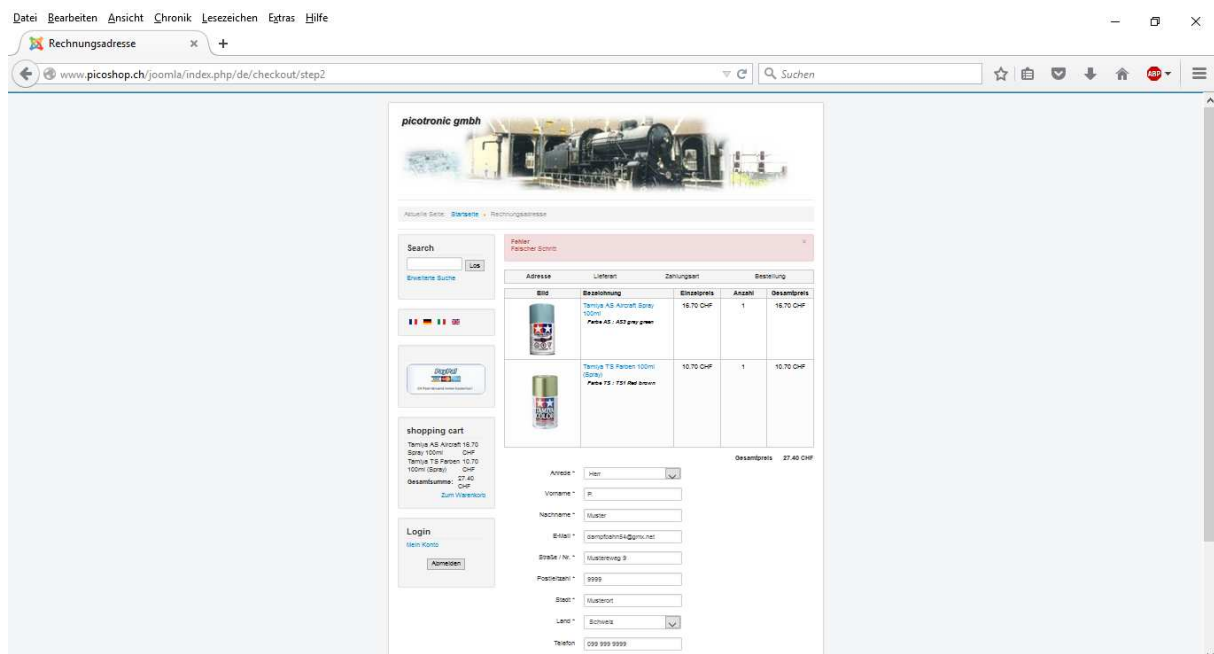

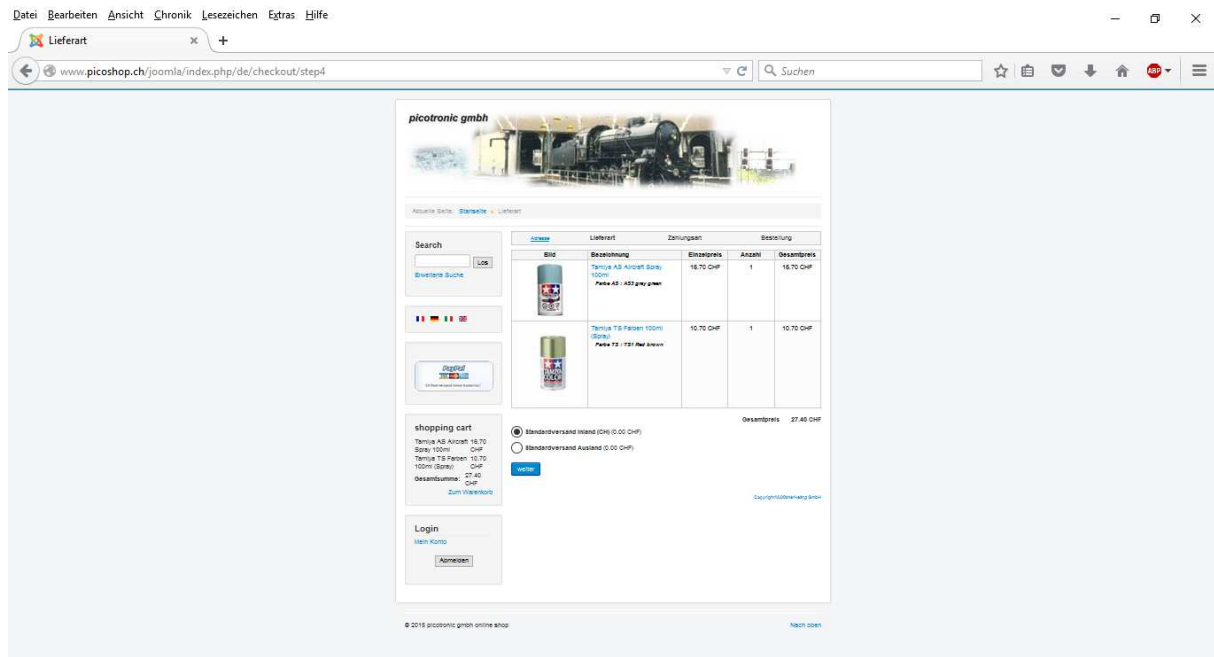

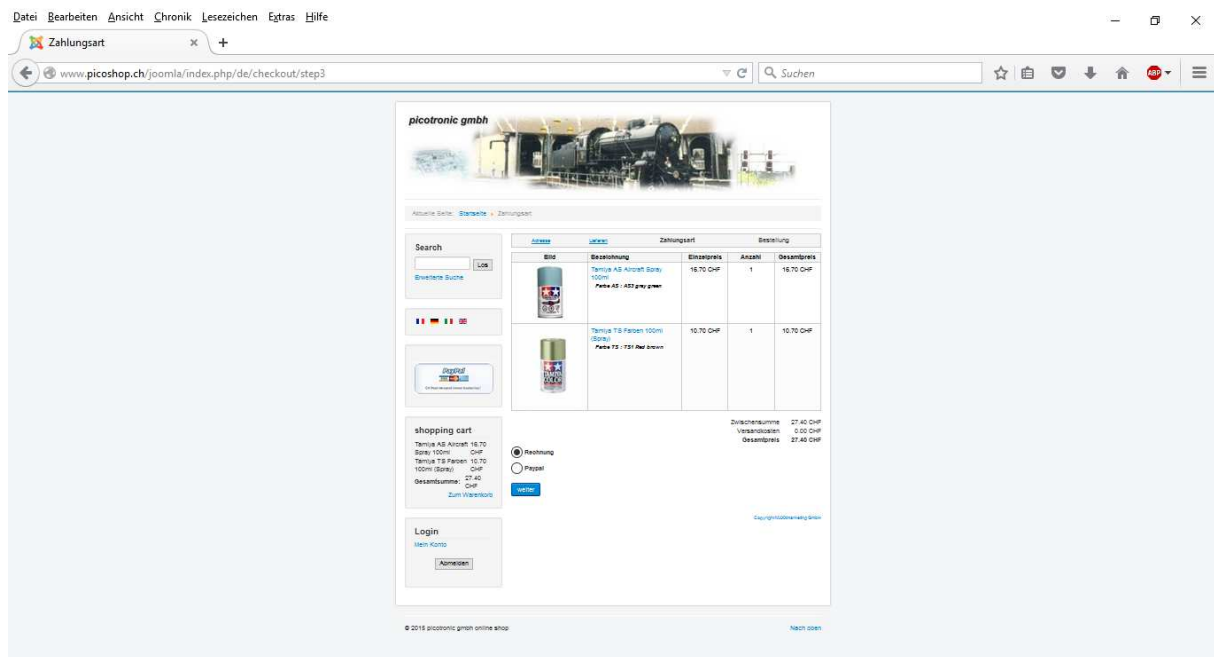

**(www.picoshop.ch)**

**The system brings me to the customer page as it should be:**

**Next step to select the shipment method:**

**Then select the payment method, everything look fine**:

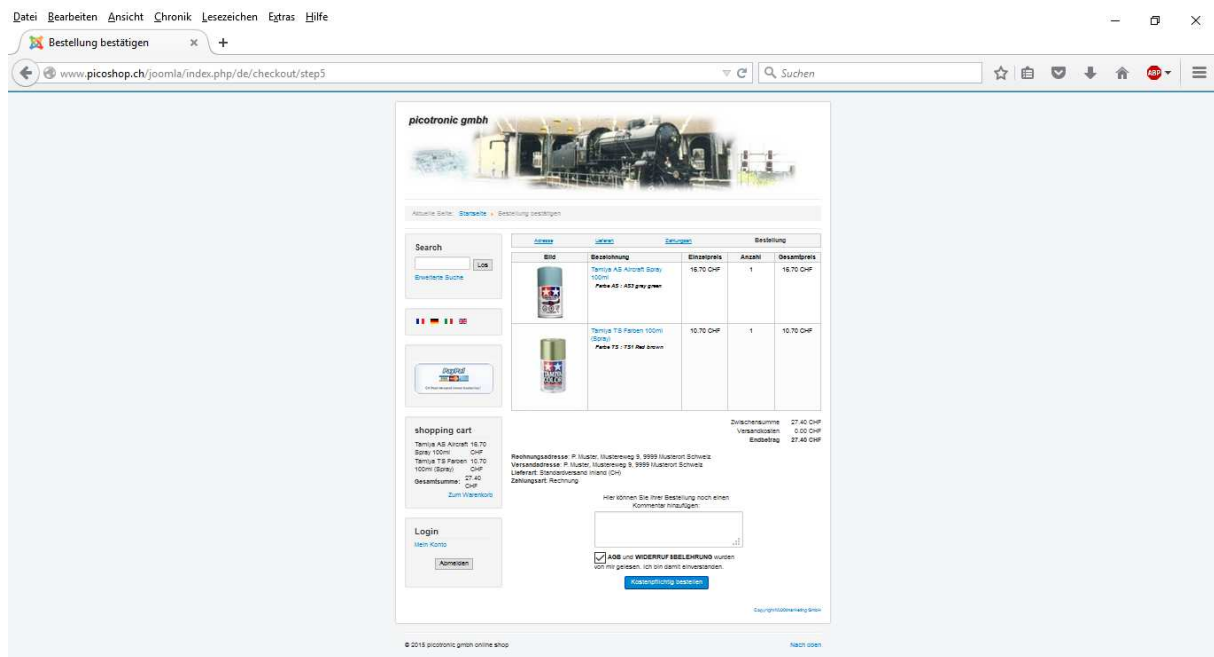

**Then, the system bring me back to the first page !!**

**And display an error message "falscher Schritt" (wrong step):**

**All steps once again – until the last page without any error message:**

**Oops, same again:**

**„Falscher Schritt" (wrong step) and return to the first page**:

**Do all steps once again – and the order is confirmed**

**The result: the order is issued two times (!) the handling unusable !**

**System is on v.4.10.5, Joomla is v.3.4.4, PHP v.5.6.13, MySQL v.5.6.24.**

**Does anybody have an idea what is going wrong here ?**
