

JoomShopping AddOn „Universal CSV Export“ Problem

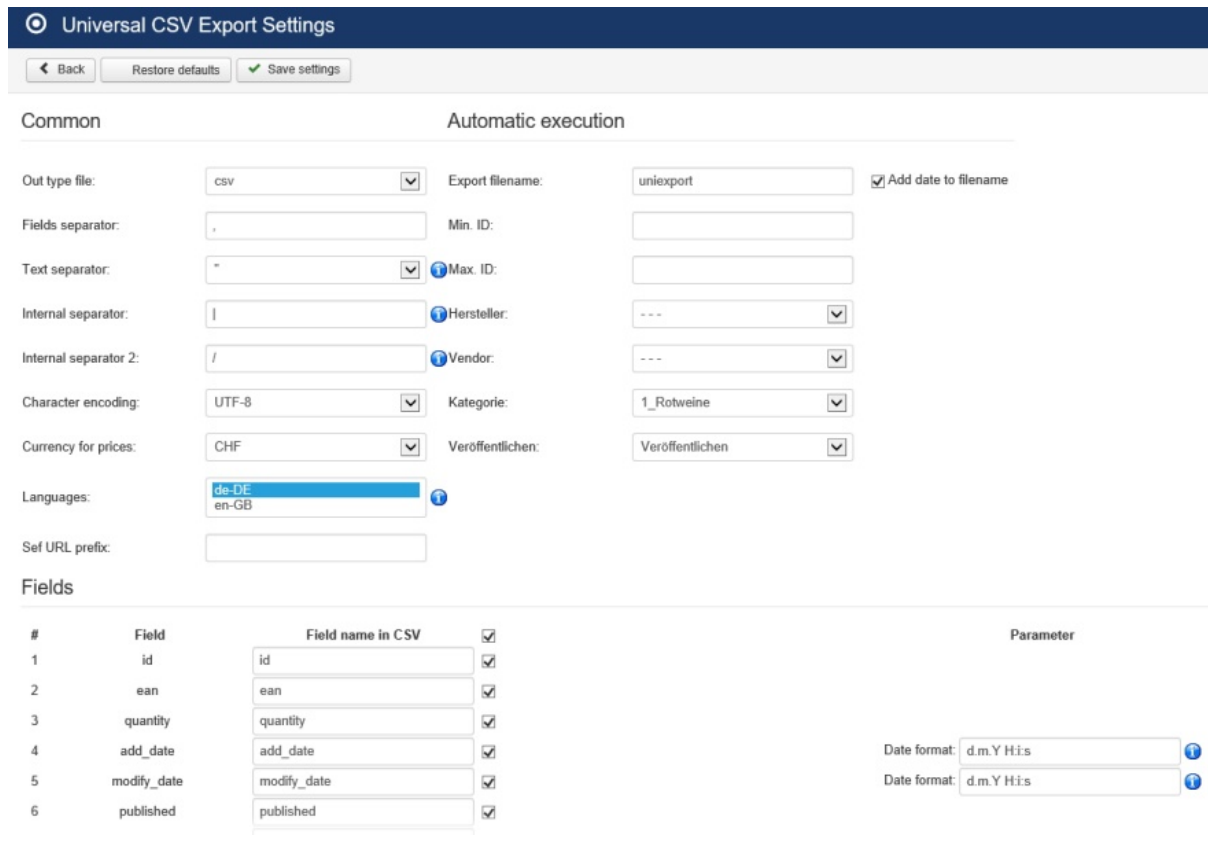

The screenshot shows the Joomla! administration interface. At the top, there is a navigation menu with items like System, Benutzer, Menüs, Inhalt, Komponenten, Erweiterungen, and Hilfe. Below this is the 'Import & Export' section header. A secondary menu lists various categories: Hersteller, Währungen, Steuersätze, Zahlungsart, Versandarten, Versandkosten, Lieferzeit, Bestellstatus, Länderauswahl, Benutzergruppen, Produktetiketten, Produktcharakteristik, Import & Export (highlighted with a red box), Addons, and Statistik. Below this, another row of options includes Überprüfen der Tabellen und Felder, Sprachpaket - Editor, Land/Provinz/Gebiet, and Resize Bild. On the left, a sidebar menu lists 'Optionen' and 'Einstellungen'. The main content area displays a table of export/import options:

#	<input type="checkbox"/>	Titel	Beschreibung	Automatische Ausführung	Löschen	ID
1	<input type="checkbox"/>	Simple Export	Simple Export in CSV iso-8859-1	<input checked="" type="checkbox"/>	<input type="button" value="X"/>	1
2	<input type="checkbox"/>	Simple Import	Simple Import in CSV iso-8859-1	<input checked="" type="checkbox"/>	<input type="button" value="X"/>	2
3	<input type="checkbox"/>	Universal CSV Export	Universal CSV Export. Various fields, encodings, other settings.	<input checked="" type="checkbox"/>	<input type="button" value="X"/>	3

The screenshot shows the configuration page for the 'Universal CSV Export' add-on. It features a navigation bar with 'Zurück zu "Import & Export"', 'Settings', and 'Enter License key'. The main configuration area includes fields for 'Export filename:' (set to 'uniexport'), 'Add date to filename' (checked), 'Min. ID:', 'Max. ID:', 'Hersteller:' (set to '---'), and 'Vendor:'. Below these are dropdown menus for 'Kategorie:' (set to '1_Rotweine') and 'Veröffentlichen:' (set to '---'). There is also an 'Export by parts (lines):' field. A 'Present files' section contains a table with columns for '#', 'Name', 'Size', 'Datum', and 'Löschen', but it is currently empty.

The screenshot shows the 'Universal CSV Export Settings' page. It has a navigation bar with 'Back', 'Restore defaults', and 'Save settings'. The settings are organized into two main sections: 'Common' and 'Automatic execution'. The 'Common' section includes: 'Out type file:' (set to 'csv'), 'Fields separator:' (set to ','), 'Text separator:' (set to '"'), 'Internal separator:' (set to '|'), 'Internal separator 2:' (set to '/'), 'Character encoding:' (set to 'UTF-8'), 'Currency for prices:' (set to 'CHF'), and 'Languages:' (set to 'de-DE'). The 'Automatic execution' section includes: 'Export filename:' (set to 'uniexport'), 'Add date to filename' (checked), 'Min. ID:', 'Max. ID:', 'Hersteller:' (set to '---'), 'Vendor:' (set to '---'), 'Kategorie:' (set to '1_Rotweine'), and 'Veröffentlichen:' (set to 'Veröffentlichen'). Below these sections is a 'Fields' section with a table:

#	Field	Field name in CSV	<input checked="" type="checkbox"/>	Parameter
1	id	id	<input checked="" type="checkbox"/>	
2	ean	ean	<input checked="" type="checkbox"/>	
3	quantity	quantity	<input checked="" type="checkbox"/>	
4	add_date	add_date	<input checked="" type="checkbox"/>	Date format: d.m.Y H:i:s
5	modify_date	modify_date	<input checked="" type="checkbox"/>	Date format: d.m.Y H:i:s
6	published	published	<input checked="" type="checkbox"/>
