3. Product Details with Text in Attribute: Price Correct

Demo Product with Group Price

When you click on "buy" the product details are displayed. Now the price changes to 500 Euro. This is correct. No further discounts are given.

The free text attribute in the frontend is a mandatory field. During the last test the price changed as soon as something was entered in the attribute. Today the price remains correct. Something is not correct. The product overview still shows the wrong price. I can't understand the problem.

As soon as the product is added to the shopping cart, the price changes again. The discount is given after all. This is wrong.

Demo Text in Attribute

* Required

Price: 500.00 EUR (Brutto: 595.00 EUR)

19 % TAX

Quantity: 1 ADD TO CART

2. Product Overview: Wrong Price

Demo Product with Group Price

This product has a fixed group price of 500 Euro net and a free text attribute. No further group discounts may be used. After login with group price (10%) the price is directly changed here in main view. This is not correct.

Price: 450.00 EUR

Brutto: 535.50 EUR

19 % TAX

Productcode: TESTNUMBER
